

# Expanding CDFI Coverage in Underserved Areas

## Understanding CDFI Impact

Jeannine Jacokes, Community Development Bankers Association  
Beth Lipson, Opportunity Finance Network

January 12, 2016

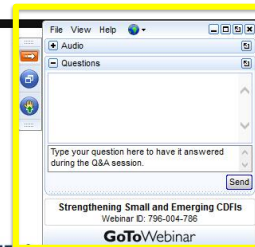

Provided by OPPORTUNITYFINANCE NETWORK

## GoToWebinar

### CDFI Fund's Capacity Building Initiative

- The Capacity Building Initiative will greatly expand technical assistance and training opportunities for Community Development Financial Institutions (CDFIs) nationwide and significantly boost the ability of CDFIs to deliver financial products and services to underserved communities.
- Industry-wide training will target key issues currently affecting CDFIs and the communities they serve.

Provided by OPPORTUNITYFINANCE NETWORK

## What is the *Expanding CDFI Coverage in Underserved Areas Initiative*?

- The series will provide specialized training and technical assistance to certified and emerging Community Development Financial Institutions (CDFIs) seeking to expand their reach into underserved communities that currently lack a CDFI presence.
- The workshops include content that is applicable to all CDFI organizational structures, including loan funds, credit unions, banks, and venture capital funds.

## Training Partners

5

Provided by **OPPORTUNITYFINANCE NETWORK**

## About the Training Partners

- **Community Development Bankers Association (CDBA)** is a national trade association of the community development bank sector. CDBA is the voice and champion of banks and thrifts with a mission of serving low and moderate income communities.
- **Community Development Venture Capital Alliance (CDVCA)** is a network of community development venture capital funds, which provide equity capital to growth businesses in low-income communities to create good jobs, productive wealth, and entrepreneurial capacity.
- **National Federation of Community Development Credit Unions (NFCDCU)** is a national association for community development credit unions providing capital, advocacy, technical assistance, training to support innovative services for low-income consumers.
- **Opportunity Finance Network (OFN)** is a leading national network of community development financial institutions (CDFIs) investing in opportunities that benefit low-income, low-wealth, and other disadvantaged communities across America.

## Goals of the Webinar

- Understand the vocabularies and frameworks for impact data collection.
- Learn how to align impact measurement with strategic goals.
- Build internal culture of impact data collection.
- Identify processes and systems to streamline data collection/reporting.
- Enhance skills to communicate your CDFI's work.

8

Provided by **OPPORTUNITYFINANCE** NETWORK

# Overview

- Introduction to Impact Data
- Getting Started: Planning, Goal Setting, and Strategy Alignment
- Impact Data and Importance of CDFI Culture
- Primary Data and Secondary Data: Putting it Together
- OFN Findings Related to Job Creation Impact Data
- Data Collection Systems, Implementation, and Quality Control
- Best Practices & Recommendations

9

Provided by **OPPORTUNITYFINANCE** NETWORK

# Introduction to Impact Data

10

Provided by **OPPORTUNITYFINANCE** NETWORK

## What is Impact Data?

- Impact Data combines the:
  - **Output** of your CDFI (e.g. number of loans, dollar amount of loans) with
  - **Outcomes** of your activity (e.g. jobs created, businesses started)

11

Provided by **OPPORTUNITYFINANCE** NETWORK

## Defining Outputs

- Output data refers to any data about an institution's activities and services that is collected **at the time of product or service delivery** (e.g., at loan closing or beginning of technical assistance).
- Examples include:
  - Dollar amount (\$) and number of loans (#) closed or disbursed.
  - Type or purpose of loans (e.g., construction and land development, multifamily, commercial and industrial).
  - Customer characteristics at time of loan close: income level, geographic location, NAICS industry code, tax status, number of existing employees in the business, etc.
  - Number and type of depository accounts (checking, savings, time deposits) opened or closed.

12

Provided by **OPPORTUNITYFINANCE** NETWORK

## Defining Outcomes

- Outcome data describe the positive changes over time for the organization's customers or the communities it serves, **after the CDFI's delivery of services, as a result of the product or service delivery.**
- There are two categories of outcome data:
  - **Intermediate outcomes:**
    - e.g., Rehab loan to a multi-family housing development **results in** X number of units rehabbed and X number of units deemed affordable.
  - **End outcomes:**
    - e.g., Rehab loans for single-family homes in a distressed neighborhood that, over time, help stabilize the community as measured by increased housing values and/or new business start-ups.

13

Provided by OPPORTUNITYFINANCE NETWORK

## What is Collected?

Utilizes **primary** and **secondary** data to further strengthen mission-strategy alignment.

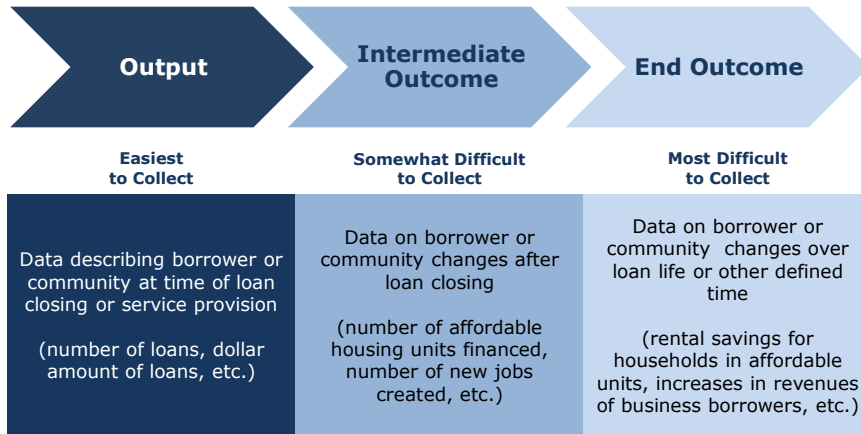

Primary Data	Secondary Data
Collected from firsthand experience (in person or via loan documents).	Collected and reported by a third party such as government agencies, proprietary, or academic sources.

14

Provided by OPPORTUNITYFINANCE NETWORK

# A Spectrum of Impact Measurement Options

15

Provided by OPPORTUNITYFINANCE NETWORK

# Key Outcome Statistics Collected in the Industry

Housing	Business	Community Services	Commercial Real Estate	Consumer
Housing units created, renovated, or preserved	Jobs created & retained	Healthcare slots	Square feet of commercial real estate developed or rehabbed	Payday loan alternatives
% units affordable to low-income people	Financing of minority and women-owned or controlled businesses	Education slots	\$ amount annual property tax assessment value	Credit builder loans
Residential mortgage loans closed to first-time homebuyers	Financing of low-income owned or controlled businesses	Childcare slots	\$ amount annual property taxes paid	Financial literacy and credit counseling

16

Provided by OPPORTUNITYFINANCE NETWORK

# Why Do We Collect Impact Data?

## Internal Benefits

- Understand **how effectively you are serving** your community
- Build **an internal culture** around your mission
- Ensure there is **internal alignment** of strategies and operations that will help you achieve mission-related goals
- **Better Understand** your customers

## External Benefits

- Satisfy regulatory or funder reporting requirements
- **Increase competitiveness** for external resources programs by demonstrating to stakeholders your ability to deliver on mission
- **Strengthen the effectiveness** of your marketing & communications strategy (**tell your CDFI's story** with greater credibility)

17

Provided by **OPPORTUNITYFINANCE** NETWORK 

# Getting Started: Planning, Goal Setting, and Strategy Alignment

18

Provided by **OPPORTUNITYFINANCE** NETWORK 

## Planning: Be Intentional

- **Intentionality:** Intentionality is a critical factor in creating an effective impact assessment system. Taking intentional, but achievable steps, is critical to long term success.
- **Planning and Goal Setting:** CDFIs with the most robust impact data collection systems engage in planning processes to identify their community impact goals before identifying impact metrics to collect. Think ahead to how you will measure the impact of your activities to expand coverage in underserved areas.

*This planning process is both interrelated with, and an outgrowth of, broader strategic planning for your CDFI.*

19

Provided by OPPORTUNITYFINANCE NETWORK

## Planning: Be Intentional

- **Alignment:**
  - It is critical that products, services, and delivery systems align with strategic priorities. Review, revise to sharpen your focus on expansion to underserved areas.
  - Examine current data collection efforts. Do the data demonstrate if you have achieved your goals?

20

Provided by OPPORTUNITYFINANCE NETWORK

# Planning & Designing Your CDFI's "Feedback Loop"

Create an internal feedback loop for collecting, reviewing, and analyzing data to better understand customers and inform future strategies

1. Mission: Define your mission and desired positive change
2. Goal Setting: Set impact goals
3. Products and Services: Review for alignment with mission and impact goals
4. Delivery Strategies: Review for alignment with mission and impact goals
5. Outputs: Select outputs that align with key goals
6. Outcomes: Select outcomes that align with key goals

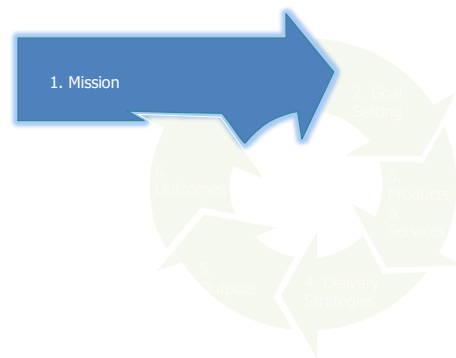

21

Provided by OPPORTUNITYFINANCE NETWORK

## Step One: Define Your Mission and Your Desired Change

- What are you trying to accomplish in your community?
- First: Examine your mission statement.
- Second: Identify the positive change(s) you are trying to produce.
- Third: Do they match up? Adjust as needed.

22

Provided by OPPORTUNITYFINANCE NETWORK

## Step Two: Set Impact Goals

What are the impact goals and objectives that define intermediate and long term changes your CDFI would like to generate?

- Example: Increased community stabilization, increased housing values, and decreased unemployment rate

Ask: Do the mission and goals tie together and reinforce each other? Are they disconnected? Do they work across multiple purposes?

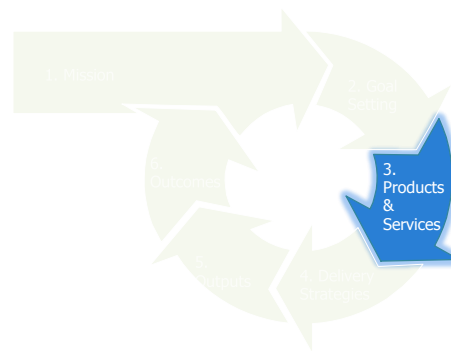

23

Provided by OPPORTUNITYFINANCE NETWORK

## Step Three: Review Products & Services for Alignment

Given your mission and impact goals, does your CDFI's current mix of products and services support achievement of those goals?

- How does each current product and service feed into accomplishing the goals?
- Are there adjustments in products or services that would better enable your success?
- Consider profitability/financial viability of new products and services

### **Example Goal: Promote First Time Home Ownership**

- Do you offer the right mix of loan products that are well suited for first time buyers (e.g., modest down payments)?
- Do you offer home ownership counseling or classes to help customer understand how to build or improve their credit scores, how to maintain a house, etc.?

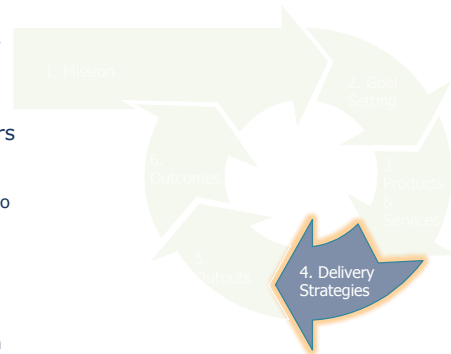

24

Provided by OPPORTUNITYFINANCE NETWORK

## Step Four: Review Delivery Strategies for Alignment

Given your mission, impact goals, and mix of supporting products and services, does your set of delivery strategies support achievement of those goals?

- If your goal is to reach new customers that are currently un- or under-banked:
  - Do you offer ways for the customers to reach you remotely (e.g. mobile or online banking)?
  - Do you partner with nonprofits, credit counselors, churches, or others that already work directly with the customers you want to reach?
  - Are your written materials available in the primary languages of the target customer group or presented in a clear concise material that is free of jargon?

25

Provided by OPPORTUNITYFINANCE NETWORK

## Step Five: Selecting Outputs that Align with Goals

Given your mission, impact goals, and mix of supporting products, services and delivery strategies, what outputs best measure progress towards your stated goals?

Examples:

- **Employment:** business revenues at loan close
- **Housing:** \$ in affordable housing loans, \$ of loans in low-income census tracts
- **Commercial Real Estate:** size of building to be rehabilitated, # of tenants occupying building at loan close

26

Provided by OPPORTUNITYFINANCE NETWORK

## Step Six: Selecting Outcomes that Align with Achievement of Goals

Given your mission, impact goals, and mix of supporting products, services and delivery strategies, what outcomes best measure progress towards your stated goals?

Examples:

- **Employment:** # jobs created/maintained
- **Housing:** # housing units developed/rehabbed/preserved, # of first-time homebuyers with an affordable mortgage
- **Commercial Real Estate:** # total sq. ft. developed

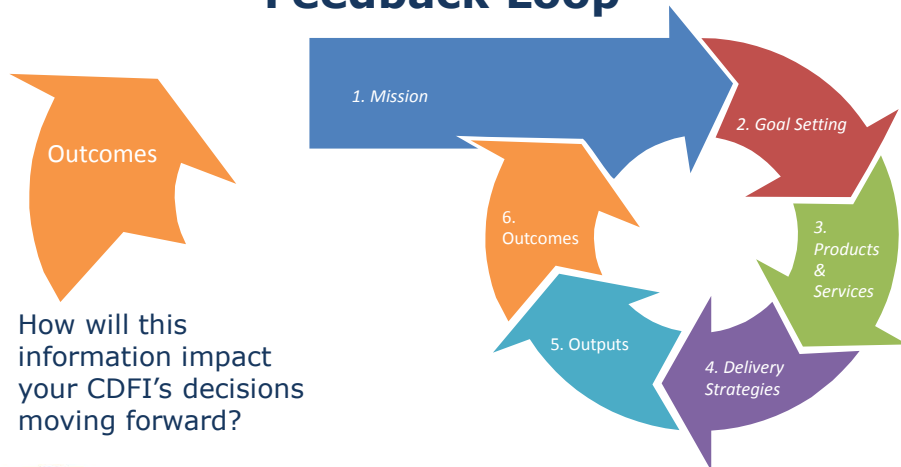

Tip: Consider what you can track and what conclusions you can draw from there.

27

Provided by OPPORTUNITYFINANCE NETWORK

## Incorporate Data Back Into Feedback Loop

How will this information impact your CDFI's decisions moving forward?

28

Provided by OPPORTUNITYFINANCE NETWORK

# Impact Data and Importance of CDFI Culture

29

Provided by OPPORTUNITYFINANCE NETWORK

## Culture of CDFIs

- CDFIs are, by definition, **mission-driven** financial institutions.
- Impact data collection aligns perfectly with mission-driven strategies to affect community development.
- Biggest success factor in creating an effective impact assessment system is developing an organizational culture that values impact data **as a key tool for achieving mission and organizational goals.**

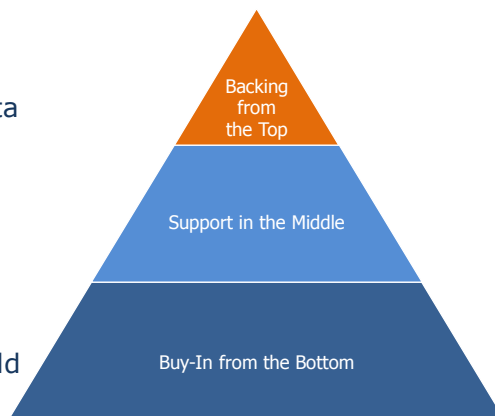

30

Provided by OPPORTUNITYFINANCE NETWORK

## Creating an Internal Culture that Values Impact Data Collection

- Leadership should explicitly recognize the need to create a culture that prioritizes impact data collection.
- CEOs must make impact data collection a priority for managers.
- All levels of the organization (board, management, staff) should be engaged in planning.

Three Levels of Support

31

Provided by OPPORTUNITYFINANCE NETWORK

## Keys to Organizational Buy-In

- Identify top-level leader to spearhead efforts.
- Appoint management staff responsible for collection, quality control, and reporting.
- Identify key front-line staff directly responsible for data collection (e.g., loan officers, compliance staff) and work with them to make data collection easy and inexpensive.
- Codify impact collection practices and policies in writing; educate existing staff and include in new staff orientation.
- Communicate impact performance several times a year to the entire organization.

32

Provided by OPPORTUNITYFINANCE NETWORK

# Primary Data and Secondary Data: Putting it Together

33

Provided by OPPORTUNITYFINANCE NETWORK

## What is Primary Data and how is it Useful?

- Primary data is information collected or observed directly from first hand experience (in person or via loan documents)
- **Examples:**

Tip: The staff delivering services directly to customers provides your CDFI the best opportunity to collect primary data (e.g. loan and development services officers).

34

Provided by OPPORTUNITYFINANCE NETWORK

## Primary Data: Regulatory Considerations for Depository CDFIs

- Regulatory prohibitions create **significant barriers and confusion to collecting primary borrower data** on race, gender, ethnicity, etc. As a result, regulated institutions do not have complete demographic data on their customer base (except for home mortgage lending)
- Two CDBA member banks (CDFI banks) have piloted customer data collection techniques using technology and other strategies that separate customer data collection from the credit decision process
- So far (while new) these efforts seem to be acceptable to regulatory agencies

### Regulatory Considerations for Impact Data Collection

<b>Equal Credit Opportunity Act (ECOA)</b>	Prohibits collecting data on race, national origin, gender, religion, and other factors for all credit transactions except a primary residence
<b>Fair Housing Act</b>	Prohibits lenders from discriminating on the basis of race, color, religion, gender, handicap, familial status, or national origin
<b>HMDA</b>	Requires collection of data on race, ethnicity, gender, income, and location for mortgage lending on a primary residence

35

Provided by OPPORTUNITYFINANCE NETWORK

## What is Secondary Data and How is it Useful?

- Secondary data is data collected and reported by a third party such as by government agencies, proprietary, or academic sources
- **Targeting:** Census tract location data can be used to create **simple output measures at the community level** that indicate the extent to which a CDFI is *targeting resources to specific low-income or other target census tract* (e.g., as required for CDFI (re)certification)
- **Long Term Outcome:** Secondary data can be used to develop a set of inexpensive, easy-to-access **outcome indicators** that track *changes in economic and community well-being over time*
  - Examples: changes in percentage of area median family income, percentage of families below poverty line, annual unemployment rate

### Examples of Free Secondary Sources

- Bureau of Labor Statistics Quarterly Census of Employment and Wages
- Census' Small Area Income and Poverty Estimates
- Consumer Financial Protection Bureau, Rural, and Underserved Counties
- HUD Neighborhood Stabilization Program Targeting
- PolicyMap
- USDA Food Access Research Atlas

Tip: Various geospatial mapping programs enable you to access free and subscription-based secondary data sources such as PolicyMap.

36

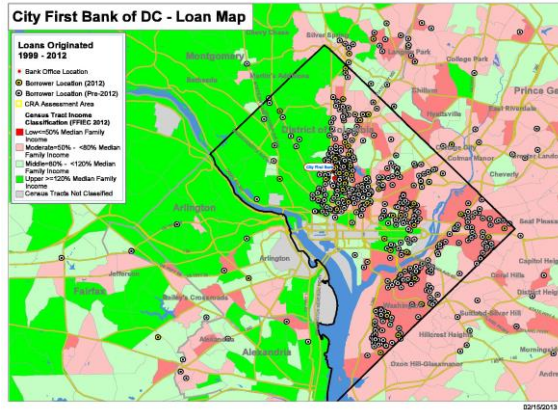

Provided by OPPORTUNITYFINANCE NETWORK

# Understanding Impact through Data

## Case Study: City First Bank of DC

Map using primary & secondary data to demonstrate targeting to LMI communities.

- Uses only a few outputs and outcomes: loan location, low and moderate income (LMI) status of the census tract
- Mapping can demonstrate strong commitment to lending in LMI communities
- Presented to investors, public officials, Capitol Hill, etc.

Provided by OPPORTUNITYFINANCE NETWORK

37

# Case Study: OFN Findings Related to Job Creation Impact Data

Provided by OPPORTUNITYFINANCE NETWORK

38

## Jobs Data Collection

- OFN Experience through Create Jobs for USA initiative
  - Dataset of more than 30,000 loans to community businesses
  - CDFIs report job projections and actual jobs created
  - Projected \$21,000 financing per 1 job created and retained

39

Provided by OPPORTUNITYFINANCE NETWORK

## Lessons Learned on Collection and Processes

### **Policies / Procedures**

- Organizational Commitment
- Importance of Clear Workflow
- Internal Quality Control

### **Data Collection**

- Written Statement for Borrowers
- Definitions / Glossary of Terms
- Forms and Documents, Reporting Guidelines

40

Provided by OPPORTUNITYFINANCE NETWORK

# Lessons Learned on Collection and Processes

## Recording the Data

- Software System

## Getting to Total Jobs

- Jobs Created
- Jobs Retained
- Indirect Jobs
- Induced Jobs

41

Provided by OPPORTUNITYFINANCE NETWORK

# Jobs Definitions

- **Jobs Created:** The new jobs the business owner reports to have been created since the loan closed net of any job losses during the same period.
- **Jobs Retained:** Jobs Retained are the jobs that would have been lost if the loan had not closed.
- **Indirect Jobs:** The jobs created or retained by businesses in support industries (e.g., for construction projects, construction materials suppliers, architects, engineers, and other businesses that support the construction project will experience an increase in demand and will create and retain jobs as a result).
- **Induced Jobs:** The jobs created or retained by businesses that the workers spend their disposable income on (e.g., the new employees of the construction business will spend their wages at restaurants, grocery stores, etc.).

*Challenges with inconsistent jobs definitions.*

42

Provided by OPPORTUNITYFINANCE NETWORK

# Lessons Learned on Collection and Processes

## Projections Models

- When to Use a Projection Model
- Widely-Used Models
  - Model by NAHB (National Association of Home Builders)
  - IMPLAN
  - Aspen's Field MicroTest Client Outcomes Survey

43

Provided by OPPORTUNITYFINANCE NETWORK

# Quality of Jobs

What information do CDFIs track?

- Wages
- Number of Hours Worked
- Benefits
- Health/dental/life insurance
- Paid holiday/vacation/sick leave
- Other (retirement contribution, paid child care, etc.)

Increasing importance in the industry

44

Provided by OPPORTUNITYFINANCE NETWORK

## Case Study: Jobs Data Collection by Kentucky Highlands Investment Corporation (KHIC)

### Jobs Data Collection Procedures

- Investment analyst collects jobs data during application process
  - Number of jobs prior to investment and projected jobs to be created and/or retained
- Formal jobs survey by all borrowers at the time of loan closing
- Lending department requests jobs data and financial and wage information on an annual basis
  - Survey sent to all borrowers by lending department

45

Provided by OPPORTUNITYFINANCE NETWORK

## Data Collection Systems, Implementation, and Quality Control

46

Provided by OPPORTUNITYFINANCE NETWORK

## Investing in Data Collection Systems

- Investing in appropriate data collection systems is important. CDFIs need to recognize up-front that data collection costs are real.
- Strategies to mitigate costs include planning, studying internal data, mining cheap data sources, sharing best practices with peers, and using technology effectively.

### Examples of Data Collection Systems

- Client Relationship Management Systems: Salesforce, SAP CRM, Oracle CRM
- Mapping Software: CIMS, PolicyMap, ArcGIS, QGIS, OFN's CDFI Coverage Map
- Custom Database Software: Oracle, Microsoft SQL Server, MySQL, Microsoft Access

47

Provided by OPPORTUNITYFINANCE NETWORK

## Maintaining Quality Control

Challenge	Strategies
<b>Maintaining quality control</b>	<ul style="list-style-type: none"> <li>• Employ consistent data collection methods</li> <li>• Provide staff training</li> <li>• Have written policies and procedures</li> <li>• Create financial incentives for staff to consistently collect data</li> <li>• Use electronic loan application systems (e.g., collecting all data at application from borrowers, designating mandatory data fields for internal staff use)</li> </ul>
<b>High cost and burdensome collection</b>	<ul style="list-style-type: none"> <li>• Use data on your target community already collected from secondary sources</li> <li>• Check that your IT system can create customized data fields and reports</li> <li>• Ability to download data for analysis</li> <li>• Ask borrowers for reports they already generate for other purposes that can be used for impact reporting (e.g., audit, employer's federal quarterly tax returns, Form 990 for nonprofits, payroll reports)</li> </ul>

48

Provided by OPPORTUNITYFINANCE NETWORK

# Case Study: Neighborhood Trust Financial Partners

Neighborhood Trust uses a salesforce based system to track one-on-one financial counseling outputs and outcomes

- Financial Counseling Outputs:
  - Number of clients
  - Number of counseling sessions
  - Number of action steps taken
- Financial Health Outcome Metrics:
  - Becoming banked
  - Improve self-efficacy and financial management
  - Increase savings
  - Decrease unproductive debt
  - Establish and improve credit

Provided by OPPORTUNITYFINANCE NETWORK

## Best Practices and Recommendations

Provided by OPPORTUNITYFINANCE NETWORK

## Recommendations

- Be intentional and plan up front
- Create feedback loop to inform future strategies
- Create an internal culture that makes impact measurement a priority
- Identify and share best practices among CDFI peers
- Define data you are collecting
- Manage restrictions on collection of borrower data
- Mine inexpensive data sources and maximize the use of secondary data
- Evaluate impact software and sources to fund
- Recognize costs upfront but understand system development is evolutionary over time
- Get started! Start with what you have and work from there
